Unconsolidated Condensed Interim Financial Statements For the three months period ended March 31, 2025

Directors' Report to the Shareholders Standalone Financial Statements

Dear Shareholders,

The Board of Directors are pleased to present the un-audited condensed interim standalone financial statements of the Bank for the three-months period ended March 31, 2025.

Economic Environment

The global economy has continued to display resilience amid a complex backdrop of moderating inflation, geopolitical tensions, tariff conflicts and tightening financial conditions. According to the IMF, global growth is expected to remain steady at 3.2% in 2025, mirroring the pace recorded in 2024. As headline inflation continues to ease, central banks, particularly in advanced economies, are signalling a shift towards a more neutral stance, thereby improving prospects for capital flows to emerging markets.

Pakistan's economy continues to show recovery trend in the backdrop of fiscal discipline, improved external accounts, and easing inflationary pressures. Following a challenging FY'24, Pakistan's GDP growth is projected to exceed 2.5% in FY'25, supported by a robust agriculture sector, a gradual rebound in industrial output, and stronger services sector activity. Inflation has sharply decelerated, reaching 3.9% in March 2025, down from nearly 40% in May 2023, due to improved supply chains, lower global commodity prices, and prudent monetary management. In response, the State Bank of Pakistan has slashed the policy rate in a series of steps from 22% to 12%, significantly reducing borrowing costs and revitalizing credit demand, particularly in SME and consumer segments.

The external account has stabilized, driven by better current account management, resilient remittance inflows, and reduced import pressure. Inflows under the \$7 Bn IMF Stand-By Arrangement, initiated in late 2024, along with committed multilateral financing, have strengthened Pakistan's foreign exchange buffers. As of March 2025, forex reserves stood at over \$9 Bn, reflecting a significant improvement from previous lows. Additionally, the World Bank's \$20 Bn commitment over ten years, focused on green energy, education, climate resilience, and human development, reinforces the government's development priorities and long-term reform agenda.

Capital markets have responded positively to macroeconomic improvements. The KSE-100 Index continued its strong upward trajectory in Q1'25, building on the 84% gain recorded in 2024, supported by foreign investor interest, improved corporate earnings, and greater confidence in economic policy direction. Banks have benefited from improving credit demand and lower funding costs. As we move forward, Pakistan's economy appears to be on a firmer footing. Continuation of macroeconomic management, political stability, and structural reforms, particularly in tax, energy, and state-owned enterprise governance, will be critical to sustaining recovery momentum.

Strong Financial Delivery

Your Bank commenced the financial year 2025 on a strong note, recording a Profit After Tax 'PAT' of PKR 21.45 Bn for the first quarter, representing a 100% increase over the PKR 10.72 Bn earned in the corresponding period of the previous year. This performance reflects the resilience of our business model, the agility of our asset-liability strategy, and a consistent focus on value creation for all stakeholders.

Core Income Growth Anchored in Net Interest Performance

A key driver of this outperformance was the significant expansion in Net Mark-up / Interest Income, which grew to PKR 69.59 Bn from PKR 28.98 Bn in Q1'24, a YoY growth of over 140%. This improvement was driven by:

- A strategic repricing and maturity reprofiling of earning assets in a declining interest rate environment,
- Continued momentum in interest-earning assets, especially in the lending portfolio, and
- Tactical management of the deposit base to moderate funding costs.

While total mark-up earned declined by 22.5% YoY due to broader rate movements (PKR 213.1 Bn in Q1'25 vs PKR 275.0 Bn in Q1'24), the mark-up expensed dropped more sharply by 41.7% (PKR 143.5 Bn vs PKR 246.0 Bn), indicating effective balance sheet optimization.

Stable Non-Interest Income with Growth in Core Streams

Non-mark-up income for the period under review closed at PKR 11.1 Bn, compared to PKR 13.5 Bn for Q1'24. Within this, fee and commission income rose 33% YoY to PKR 7.4 Bn, supported by growth in transaction banking, trade, and digital financial services. Foreign exchange income also improved to PKR 2.0 Bn, in line with market activity and the Bank's client flow. However, on capital markets front, a net loss of PKR 112 Mn was recorded on securities in Q1'25 versus a gain of PKR 4.4 Bn in Q1'24.

Disciplined Cost Management Amid Strategic Investments

We maintain a disciplined approach to cost management, ensuring operational efficiency while enabling long-term growth. While total operating expenses increased during the period, our continued focus on growing core income streams resulted in a marked improvement in operational efficiency.

For Q1'25, total operating expenses stood at PKR 28.2 Bn, reflecting a 28% YoY increase from PKR 22.0 Bn. This rise is attributed to deliberate investments in people, technology, and infrastructure - key enablers of sustainable growth. Key cost trends include a 30% increase in HR compensation expenses, aligned with recurring impact of pension case, talent acquisition, and notional costs under IFRS 9. Also, there was a 49% surge in IT expenses, driven by expansion of IT and digital infrastructure, managed services, and system resilience initiatives.

Notably, despite the higher cost base, our cost-to-income ratio improved significantly to 35.0%, down from 51.7% in the same period last year. This efficiency gain was not achieved through cost-cutting, but rather through robust growth in core income, reflecting the success of our strategic repositioning.

Proactive Risk Management and Credit Quality Vigilance

The Bank recorded a net credit loss allowance of PKR 6.39 Bn, versus a net reversal of PKR 665 Mn in the same period last year. This prudent provisioning approach reflects a forward-looking assessment of portfolio risks under evolving macroeconomic and sector-specific conditions, and reinforces our commitment to maintaining a robust risk posture.

Sustained Growth in Bottom Line

Profit Before Tax (PBT) rose sharply to PKR 46.09 Bn in Q1'25, more than double the PKR 21.16 Bn reported in the same quarter last year. Following the recent increase in tax rates for banking companies under the Income Tax Amendment Ordinance, the applicable corporate tax rate for 2025 stands at 53%. As a result, the Bank

recorded a tax expense of PKR 24.64 Bn for the first quarter. Despite a significantly higher tax charge for the period, the Bank delivered a strong Profit After Tax of PKR 21.45 Bn, solidifying its position as one of the top-performing institutions in the sector.

Financial Position as of March 31, 2025

The Bank's balance sheet grew modestly by 1.2% to reach PKR 6.83 Tn as of March 31, 2025, up from PKR 6.75 Tn at the year-end 2024. This increase reflects targeted asset rebalancing and selective growth in high-performing segments, aligned with our broader strategy of enhancing yield while managing risk and liquidity. Key changes in the asset mix reflect a repositioning toward safer and yield-accretive segments:

Advances

Gross advances stood at PKR 1,567.8 Bn, reflecting a decline of 6% from PKR 1,672.8 Bn as of December 31, 2024. This contraction was primarily driven by some seasonal impacts which are expected to reverse in the coming quarters. Within the loan mix, conventional loans (including revolvers) accounted for the bulk. Islamic financing remained relatively stable, decreasing to PKR 132.4 Bn. Notably, non-performing advances also declined from PKR 269.3 Bn to PKR 221.9 Bn, suggesting some recovery and better asset quality management. Overall, while the decline in gross advances reflects a moderated risk appetite, the concurrent reduction in NPAs points to prudent credit risk controls and a strengthened recovery process.

Investments

Investments rose by 3.8% to PKR 4.79 Tn, as the Bank continued to deploy surplus liquidity into secure government securities and high-grade instruments, capitalizing on prevailing market opportunities.

Lending to Financial institutions

Lending to FIs more than doubled to PKR 73.5 Bn, up from PKR 30.0 Bn, reflecting short-term liquidity placements and strategic use of interbank markets.

Funding & Liquidity

Total deposits of the Bank stood at PKR 3.89 Tn, similar to PKR 3.87 Tn at YE'24. The deposit mix remained diversified and well-balanced, with a consistent focus on optimizing cost of funds and supporting liquidity resilience. With current deposits aggregating to PKR 1,886.6 Bn as of March 31, 2025, the Bank maintained a strong liquidity buffer, with current accounts representing 48.5% of total deposits. Total CASA base totalled PKR 3,043.0 Bn, translating into a robust CASA ratio of 78.2% — consistent with the Bank's strategy to maintain a low-cost and stable funding structure. This funding mix continues to support sustainable margins and reinforces depositor confidence.

Moreover, the Bank's Liquidity Coverage Ratio (LCR) and Net Stable Funding Ratio (NSFR) remained well above the regulatory threshold of 100%, standing at 213% and 178%, respectively, as of March 31, 2025. These indicators affirm the Bank's prudent liquidity management practices and its capacity to absorb market volatility and meet both short- and long-term obligations without disruption.

Capital & Equity

The Bank's balance sheet remains robust, liquid, and strategically aligned. Despite marginal reduction in net assets from PKR 457.0 Bn to PKR 441.3 Bn (mainly due to decline in surplus on revaluation of assets from PKR 118.2 Bn to PKR 104.8 Bn), the Bank remains well-capitalized. During 3M'25, the Bank's Eligible Tier 1 capital decreased marginally by PKR 3.5 Bn or 1.0% to PKR 350.4 Bn from PKR 353.9 Bn at YE'24. Likewise, Eligible Tier 2 capital also decreased by PKR 9.8 Bn or 7.7% to close at PKR 125.9 Bn. Tier 2 capital mainly decreased corresponding to the decrease in Tier-1 capital. As the Bank is following a risk- prudent asset growth strategy, total RWAs decreased by PKR 82.8 Bn or 4.8% from PKR 1.723.1 Bn at YE'24 to PKR 1643.3 Bn at March 31, 2025.

Accordingly, Total Capital Adequacy Ratio (CAR) stood at 28.39% with Tier-1 capital adequacy ratio at 21.33%; as compared to 27.80% and 20.51%, respectively, at YE'24. At March'31, 2025, the Bank's leverage ratio stood at 3.83%. Other financial soundness ratios are well compliant with applicable regulatory requirements.

Contingency Regarding the Pension Case

Post year end, this status is same as discussed in Note 25.3.3.1 to the audited financial statements for the year ended December 31, 2024 as no date for hearing has been fixed as yet.

Credit Ratings

NBP has been rated as 'AAA' by both the recognized credit rating agencies in Pakistan. In June 2024, M/s VIS Credit Rating Company re-affirmed the Bank's standalone credit rating as "AAA", the highest credit rating awarded by the company for a bank in Pakistan. Similarly, M/s PACRA Credit Rating Company also assigned the Bank long-term entity rating as 'AAA' (Triple AAA) and short-term credit rating as 'A1+' (A-one Plus).

Your Bank remains committed to aligning its strategic direction with national priorities, including financial inclusion, SME development, and digital transformation. In the quarters ahead, we will continue to build on our resilient balance sheet, enhance risk management practices, and deepen our focus on customercentric digital innovation. - 10.5.3 General provision includes provision amounting to Rs.52 million (December 31, 2024: Rs. 90 million) pertaining to overseas advances to meet the requirements of regulatory authorities of the respective countries in which the Bank operates where IFRS 9 has not been implemented. This general provision can be maintained till December 31, 2026 under BPRD circular No. 1 of 2025 dated January 22, 2025.
- 10.5.4 The SBP had allowed specific relaxation to the Bank for non-classification of overdue loans of certain Public Sector Entities (PSEs) which are guaranteed by Government of Pakistan as non-performing loans up till December 31, 2024. Bank has applied for further relaxation from SBP, however, response is awaited. No provision is required against these loans; however, mark-up is being suspended as required by the Prudential Regulations. Further SBP has allowed specific relaxation on the requirement for ECL against overdue foreign currency loan of a Public Sector Entity permanently.
- 10.5.5 These represent non-performing advances for agriculture finance which have been classified as loss and fully provided for more than 3 years. These non-performing advances have been charged off by extinguishing them against the provision held in accordance with Prudential Regulations for Agriculture Financing issued by the SBP. This charge off does not, in any way, prejudice the Bank's right of recovery from these customers.

34. FAIR VALUE MEASUREMENTS

The fair value of quoted securities other than those classified as held to maturity, is based on quoted market price. Quoted instruments classified as held to maturity are carried at cost. The fair value of unquoted equity securities, other than investments in associates and subsidiaries, is determined on the basis of the break-up value of these investments as per their latest available audited financial statements.

The fair value of unquoted debt securities, fixed term loans, other assets, other liabilities, fixed term deposits and borrowings cannot be calculated with sufficient reliability due to the absence of a current and active market for these assets and liabilities and reliable data regarding market rates for similar instruments.

34.1 Fair value of financial assets

The Bank measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

- Level 1: Fair value measurements using quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: Fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the assets or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- **Level 3:** Fair value measurements using input for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

The table below analyses financial instruments measured at the end of the reporting period by the level in the fair value hierarchy into which the fair value measurement is categorized:

Impact on Regulatory Capital:

37.

The introduction of IFRS 9 has resulted in reduction in regulatory capital of the Banks, which has reduced their lending capacity and ability to support their clients. In order to mitigate the impact of ECL models on capital, SBP has permitted Banks to opt for transitional arrangement for the ECL impact on regulatory capital from the application of ECL accounting. Annexure B of the 'Application Instructions' issued by SBP has detailed the transitional arrangement.

Accordingly, Bank has opted for transition arrangement to phase in ECL impact and below tabulated is the impact on key ratios, had the transitional arrangement not applied.

| Key Ratios | With Transitional arrangement | Without Transitional arrangement |
|----------------------------------|-------------------------------|----------------------------------|
| Total Capital to total RWA (CAR) | 28.39% | 27.26% |
| Leverage Ratio | 3.83% | 3.63% |

39 Pool Management

NBP-AIBG has managed following pools for profit and loss distribution.

a) General depositor pool

The General pool consists of all other remunerative deposits. NBP Aitemaad (the Mudarib) accept deposits on the basis of Mudaraba from depositors (Rabbulmaal). The net return on the pool is arrived at after deduction of direct costs from the gross return earned on the pool. The entire net return after paying equity share to Mudarib is considered as distributable profit of the pool.

b) Special depositor pools (Total 46 during the period and 31 as at March 31, 2025)

Special pool(s) are created where the customers desire to invest in high yield assets. These pool(s) rates are higher than the general pool depending on the assets. In case of loss in special pool, the loss will be borne by the special pool members. The net return on the pool is arrived at after deduction of direct costs from the gross return earned on the pool. From the net return, and after allocation of share of profit to commingled equity, profit is paid to the Mudarib in the ratio of the Mudarib's equity in the pool to the total pool. The balance represents the distributable profit.

c) Equity pool

Equity pools include AIBG's fund and current account deposits. The equity pool may have constructive liquidation every month and risk associated with assets of pool includes operational, market, equity, return and Shariah.

Key features and risk & reward characteristics

Deposits are accepted from customers on the basis of Qard (current accounts) and Mudarabah (Saving and term deposits). No profit or loss is passed on to current account depositors.

For deposits accepted on Mudarabah basis from depositors (Rab ul Maal) the Bank acts as Manager (Mudarib) and invests the funds in the Shariah Compliant modes of financings. Rab ul Maal share is distributed among depositors according to weightages declared for a month before start of the period.

In case of loss in a pool during the profit calculation period, the loss is distributed among the depositors (remunerative) according to their ratio of investment.

For all pools, the Mudarib's share is deducted from the distributable profit to calculate the profit to be allocated to depositors. The allocation of the profit to various deposit categories is determined by the amount invested in that category relative to the total pool, as well as by the weightage assigned to the various deposit categories.

The assets, liabilities, equities, income and expenses are segregated for each of the pool. No pool investment is intermingled with each other. The risk associated with each pool is thus equally distributed among the pools.

- 10.5.3 General provision includes provision amounting to Rs.52 million (December 31, 2024: Rs. 90 million) pertaining to overseas advances to meet the requirements of regulatory authorities of the respective countries in which the Bank operates where IFRS 9 has not been implemented. This general provision can be maintained till December 31, 2026 under BPRD circular No. 1 of 2025 dated January 22, 2025.
- 10.5.4 The SBP had allowed specific relaxation to the Bank for non-classification of overdue loans of certain Public Sector Entities (PSEs) which are guaranteed by Government of Pakistan as non-performing loans up till December 31, 2024. Bank has applied for further relaxation from SBP, however, response is awaited. No provision is required against these loans; however, mark-up is being suspended as required by the Prudential Regulations. Further SBP has allowed specific relaxation on the requirement for ECL against overdue foreign currency loan of a Public Sector Entity permanently.
- 10.5.5 These represent non-performing advances for agriculture finance which have been classified as loss and fully provided for more than 3 years. These non-performing advances have been charged off by extinguishing them against the provision held in accordance with Prudential Regulations for Agriculture Financing issued by the SBP. This charge off does not, in any way, prejudice the Bank's right of recovery from these customers.

34. FAIR VALUE MEASUREMENTS

The fair value of quoted securities other than those classified as held to maturity, is based on quoted market price. Quoted instruments classified as held to maturity are carried at cost. The fair value of unquoted equity securities, other than investments in associates and subsidiaries, is determined on the basis of the break-up value of these investments as per their latest available audited financial statements.

The fair value of unquoted debt securities, fixed term loans, other assets, other liabilities, fixed term deposits and borrowings cannot be calculated with sufficient reliability due to the absence of a current and active market for these assets and liabilities and reliable data regarding market rates for similar instruments.

34.1 Fair value of financial assets

The Bank measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

- Level 1: Fair value measurements using quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: Fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the assets or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- **Level 3:** Fair value measurements using input for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

The table below analyses financial instruments measured at the end of the reporting period by the level in the fair value hierarchy into which the fair value measurement is categorised:

Impact on Regulatory Capital:

The introduction of IFRS 9 has resulted in reduction in regulatory capital of the Banks, which has reduced their lending capacity and ability to support their clients. In order to mitigate the impact of ECL models on capital, SBP has permitted Banks to opt for transitional arrangement for the ECL impact on regulatory capital from the application of ECL accounting. Annexure B of the 'Application Instructions' issued by SBP has detailed the transitional arrangement.

Accordingly, Bank has opted for transition arrangement to phase in ECL impact and below tabulated is the impact on key ratios, had the transitional arrangement not applied.

| Key Ratios | With Transitional arrangement | Without Transitional arrangement |
|----------------------------------|-------------------------------|----------------------------------|
| Total Capital to total RWA (CAR) | 28.19% | 27.10% |
| Leverage Ratio | 3.90% | 3.70% |

39 Pool Management

NBP-AIBG has managed following pools for profit and loss distribution.

a) General depositor pool

The General pool consists of all other remunerative deposits. NBP Aitemaad (the Mudarib) accept deposits on the basis of Mudaraba from depositors (Rabbulmaal). The net return on the pool is arrived at after deduction of direct costs from the gross return earned on the pool. The entire net return after paying equity share to Mudarib is considered as distributable profit of the pool.

b) Special depositor pools (Total 46 during the period and 31 as at March 31, 2025)

Special pool(s) are created where the customers desire to invest in high yield assets. These pool(s) rates are higher than the general pool depending on the assets. In case of loss in special pool, the loss will be borne by the special pool members. The net return on the pool is arrived at after deduction of direct costs from the gross return earned on the pool. From the net return, and after allocation of share of profit to commingled equity, profit is paid to the Mudarib in the ratio of the

c) Equity pool

Key features and risk & reward characteristics

Deposits are accepted from customers on the basis of Qard (current accounts) and Mudarabah (Saving and term deposits). No profit or loss is passed on to current account depositors.

For deposits accepted on Mudarabah basis from depositors (Rab ul Maal) the Bank acts as Manager (Mudarib) and invests the funds in the Shariah Compliant modes of financings. Rab ul Maal share is distributed among depositors according to weightages declared for a month before start of the

In case of loss in a pool during the profit calculation period, the loss is distributed among the depositors (remunerative) according to their ratio of investment.

For all pools, the Mudarib's share is deducted from the distributable profit to calculate the profit to be allocated to depositors. The allocation of the profit to various deposit categories is determined by the amount invested in that category relative to the total pool, as well as by the weightage assigned

The assets, liabilities, equities, income and expenses are segregated for each of the pool. No pool investment is intermingled with each other. The risk associated with each pool is thus equally
