incidental to delivery of the goods to their final destination. b) delivery schedule offered in the Bid; c) deviations in payment schedule from that specified in the Special Conditions of Contract; d) the cost of components, mandatory spare parts, and service; e) the availability (in Pakistan) of spare parts and after-sales services for the equipment offered in the Bid; f) the projected operating and maintenance costs during the life of the equipment; g) the performance and productivity of the equipment offered; and/or h) other specific criteria indicated in the TBS and/or in the Technical Specifications. 33.6 For factors retained in BDS, pursuant to ITB 33.5 one or more of the following quantification methods will be applied, as detailed in the BDS: (a) Inland transportation from EXW/port of entry/border point, Insurance and incidentals. Inland transportation, insurance, and other incidental costs for delivery of the goods from EXW/port of entry/border point to Project Site named in the BDS will be computed for each Bid by the PA on the basis of published tariffs by the rail or road transport agencies, insurance companies, and/or other appropriate sources. To facilitate such computation, Bidder shall furnish in its Bid the estimated dimensions and shipping weight and the approximate EXW or as per applicable INCOTERM value of each package. The above cost will be added by the NBP to EXW or as per applicable INCOTERM price. (b) Delivery schedule. i) The **NBP** requires that the goods under the Invitation for Bids shall be delivered (shipped) at the time specified in the Schedule of Requirements. The estimated time of arrival of the goods at the Project Site will be calculated for each Bid after allowing for reasonable international and inland transportation time. Treating the Bid resulting in such time of arrival as the base, a delivery "adjustment" will be calculated for other Bids by applying a percentage, specified in the BDS, of the EXW or as per applicable INCOTERM price for each week of delay beyond the base, and this will be added to the Bid price for evaluation. No credit shall be given to early delivery. Or ii) The goods covered under this invitation are required to be delivered (shipped) within an acceptable range of weeks specified in the Schedule of Requirement. No credit will be given to earlier deliveries, and Bids offering delivery beyond this range will be treated as nonresponsive. Within this acceptable range, an adjustment per week, as specified in the BDS, will be added for evaluation to the Bid price of Bids offering deliveries later than the earliest delivery period

specified in the Schedule of Requirements.

Or

(iii) The goods covered under this invitation are required to be delivered (shipped) in partial shipments, as specified in the Schedule of Requirements. Bids offering deliveries earlier or later than the specified deliveries will be adjusted in the evaluation by adding to the Bid price a factor equal to a percentage, specified in the BDS, of EXW or as per applicable INCOTERM price per week of variation from the specified delivery schedule.

(c) Deviation in payment schedule.

i) Bidders shall state their Bid price for the payment schedule outlined in the SCC. Bids will be evaluated on the basis of this base price. Bidders are, however, permitted to state an alternative payment schedule and indicate the reduction in Bid price they wish to offer for such alternative payment schedule. The NBP may consider the alternative payment schedule offered by the selected Bidder.

Or

ii) The SCC stipulates the payment schedule offered by the NBP. If a Bid deviates from the schedule and if such deviation is considered acceptable to the NBP, the Bid will be evaluated by calculating interest earned for any earlier payments involved in the terms outlined in the Bid as compared with those stipulated in this invitation, at the rate per annum specified in the BDS.

(d) Cost of spare parts

i) The list of items and quantities of major assemblies, components, and selected spare parts, likely to be required during the initial period of operation specified in the BDS, is annexed to the Technical Specifications. The total cost of these items, at the unit prices quoted in each Bid, will be added to the Bid price.

Or

ii) The NBP will draw up a list of high-usage and high-value items of components and spare parts, along with estimated quantities of usage in the initial period of operation specified in the BDS. The total cost of these items and quantities will be computed from spare parts unit prices submitted by the Bidder and added to the Bid price.

0

iii) The **NBP** will estimate the cost of spare parts usage in the initial period of operation specified in the **BDS**, based on information furnished by each Bidder, as well as on past experience of the **NBP** or other **NBP**'s in similar situations. Such costs shall be added to the Bid price for evaluation.

(e) Spare parts and after sales service facilities in Pakistan

The cost to the **NBP** of establishing the minimum service facilities and parts inventories, as outlined in the **BDS** or elsewhere in the Bidding

		(f) Operating and maintenance costs
		Since the operating and maintenance costs of the goods under
		procurement form a major part of the life cycle cost of the equipment, these
		costs will be evaluated in accordance with the criteria specified in the BDS
		or in the Technical Specifications.
		(g) Performance and productivity of the equipment.
		i) Bidders shall state the guaranteed performance or efficiency in response to the Technical Specification. For each drop in the performance or efficiency below the norm of 100, an adjustment for an amount specified in the BDS will be added to the Bid Price, representing the capitalized cost of additional operating costs over the life of the plant, using the methodology specified in the BDS or in the Technical Specifications.
		Or
		ii) Goods offered shall have a minimum productivity specified under the relevant provision in the Technical Specifications to be considered responsive. Evaluation shall be based on the cost per unit of the actual productivity of goods offered in the Bid, and adjustment will be added to the Bid price using the methodology specified in the BDS or in the Technical Specifications.
		(h) Specific additional criteria. Other specific additional criteria to be considered in the evaluation and the evaluation method shall be detailed in the BDS and/or the Technical
		Specifications.

	33.2	The NBP may adopt the Quality & Cost Based Selection Technique due to
		the following two reasons:
		i) Where the NBP knows about the main features, usage and output of the products; however not clear about the complete features, technical

		the bidders to submit their proposals defining those features,
		specifications and functionalities; or

26. Part	36.1	ii) Where the NBP, in addition to the mandatory requirements and mandatory technical specifications, requires parameters specified in Evaluation Criteria to be evaluated while determining the quality of the goods: In such cases, the NBP may allocate certain weightage to these factors as a part of Evaluation Criteria, and may determine the ranking of the bidders on the basis of combined evaluation in accordance with provisions of Rule 2(1)(h) of PPR-2004.
36. Post- qualification of Bidder and/or Abnormally Low Financial Proposal	36.1	After determining the Most Advantageous Bid, if neither the pre-qualification was undertaken separately nor any qualification parameters were undertaken as part of determining the Most Advantageous Bid, the NBP shall carry out the post-qualification of the Bidder using only the requirements specified in the BDS. In case of International Tendering, the parameters for incorporation or licensing within Pakistan may be fulfilled as part of post qualification.
	36.2	 Where the Bid price is considered to be abnormally low, the NBP shall perform price analysis either during determination of Most Advantageous Bid or as a part of the post-qualification process. The following process shall apply: a) The NBP may reject a Bid if the NBP has determined that the price in combination with other constituent elements of the Bid is abnormally low in relation to the subject matter of the procurement (i.e. scope of the procurement or ancillary services) and raises concerns as to the capability and capacity of the respective Bidder to perform that contract; b) Before rejecting an abnormally low Bid the NBP shall request the Bidder an explanation of the Bid or of those parts which it considers contribute to the Bid being abnormally low; take account of the evidence provided in response to a request in writing; and subsequently verify the Bid or parts of the Bid being abnormally low;
		 c) The decision of the NBP to reject a Bid and reasons for the decision shall be recorded in the procurement proceedings and promptly communicated to the Bidder concerned; d) The NBP shall not incur any liability solely by rejecting abnormally Bid; and e) An abnormally low Bid means, in the light of the NBP's estimate and of all the Bids submitted, the Bid appears to be abnormally low by not providing a margin for normal levels of profit. Guidance for NBP: In order to identify the Abnormally Low Bid (ALB) following approaches can be considered to minimize the scope of subjectivity: (i) Comparing the bid price with the bids offered by other bidders
		(ii) Comparing the bid price with the bids offered by other bidders submitting substantially responsive bids; and

	E OF ENTIRE AND EVALUATION OF DIDS
	(iii) Comparing the bid price with prices paid in similar contracts in the recent past either government- or development partner-funded.
36.3	The NBP will determine to its satisfaction whether the Bidder that is selected as
	having submitted the most advantageous Bid is qualified to perform the contract
	satisfactorily, in accordance with the criteria listed in ITB 13.3.
36.4	The determination will take into account the Bidder's financial, technical, and
	production capabilities. It will be based upon an examination of the documentary
	evidence of the Bidder's qualifications submitted by the Bidder, pursuant to ITB
	13.3, as well as such other information as the NBP deems necessary and
	appropriate. Factors not included in these Bidding Documents shall not be used
	in the evaluation of the Bidders' qualifications.
36.5	NBP may seek "Certificate for Independent Price Determination" from the
	Bidder and the results of reference checks may be used in determining award of
	contract.
	Explanation: The Certificate shall be furnished by the bidder. The bidder shall
	certify that the price is determined keeping in view of all the essential aspects
	such as raw material, its processing, value addition, optimization of resources
	due to economy of scale, transportation, insurance and margin of profit etc.
36.6	An affirmative determination will be a prerequisite for award of the contract to
	the Bidder. A negative determination will result in rejection of the Bidder's Bid, in
	which event the NBP will proceed to the next ranked bidder to make a similar
	determination of that Bidder's capabilities to perform satisfactorily.
